

Award Monetary Prize Transfer Declaration

We, the undersigned participants of the research paper titled '*A draft UAE-based Arab pangenome reference*' submitted to Hamdan Foundation's *Arab Award for Research in Healthcare Award– 2026 cycle*, hereby declare and agree to the following:

1. We confirm that each team member's contribution to the submitted research is accurately listed and approved in the contribution table below.
2. We jointly authorize the Foundation to transfer the total prize amount to the authorized team members (maximum of three members), as specified in the prize allocation table below.
3. Each team member will authorize only one person to receive his share of the prize money.
4. Authorized team members accept to receive team members share of the prize money

Name	Description of Contribution	% Contribution	Authorized Team Member	Signature
Nasna Nassir	Project coordination and supervision; sample selection and population genetic analysis; DNA sequencing coordination; variant annotation; assembly quality control and reliability analysis; variant detection, pangenome empirical analysis and quality control; pangenome applications; pangenome visualization, complex loci analysis and graph creation; statistical analysis; manuscript writing, editing, data coordination and management.	15	Nasna Nassir	
Mohamed A. Almarri	Conceived and designed the study; coordinated and supervised the project; sample selection and population genetic analysis; DNA sequencing; manuscript writing.	5	Alawi Alsheikh-Ali	
Muhammad Kumail	Assembly creation; assembly quality control and reliability analysis; variant detection, pangenome empirical analysis and quality control; pangenome visualization, complex loci analysis and graph	5	Mohammed Uddin	

	creation; statistical analysis.			
Nesrin Mohamed	DNA sequencing.	5	Nasna Nassir	
Bipin Balan	Variant detection, pangenome empirical analysis and quality control; pangenome applications of structural variants, short- and long-read mapping; statistical analysis.	5	Mohammed Uddin	
Shehzad Hanif	Sample selection and population genetic analysis; Variant annotation; variant detection, pangenome applications of structural variants, statistical analysis.	2.19	Nasna Nassir	
Maryam Al Obathani	Recruitment and collection of blood samples and clinical data from medical health records; DNA sequencing.	2.19	Alawi Alsheikh-Ali	
Bassam Jamalalail	Recruitment and collection of blood samples and clinical data from medical health records.	2.19	Nasna Nassir	
Hanan Elsokary	DNA sequencing.	2.19	Nasna Nassir	
Dasuki Kondaramage	DNA sequencing.	2.19	Mohammed Uddin	
Suhana Shiyas	Generation of graphs and multipanel figures. Manuscript referencing	2.19	Nasna Nassir	
Noor Kosaji	Pangenome visualization, pangenome graph creation.	2.19	Nasna Nassir	
Dharana Satsangi	DNA sequencing.	2.18	Nasna Nassir	
Madiha Hamdi Saif Abdelmotagali	Recruitment and collection of blood samples and clinical data from medical health records.	2.18	Alawi Alsheikh-Ali	

Ahmad Abou Tayoun	Manuscript writing.	2.19	Mohammed Uddin	
Olfat Zuhair Salem Ahmed	Recruitment and collection of blood samples and clinical data from medical health records.	2.18	Alawi Alsheikh-Ali	
Douaa Fathi Youssef	Recruitment and collection of blood samples and clinical data from medical health records.	2.18	Alawi Alsheikh-Ali	
Hanan Al Suwaidi	Manuscript writing.	2.19	Alawi Alsheikh-Ali	
Ammar Albanna	Recruitment and collection of blood samples and clinical data from medical health records.	2.19	Alawi Alsheikh-Ali	
Stefan S. Du Plessis	Conceived and designed the study; manuscript writing.	2.19	Mohammed Uddin	
Hamda Hassan Khansaheb	Recruitment and collection of blood samples and clinical data from medical health records; sample selection and population genetic analysis.	2.19	Mohammed Uddin	
Alawi Alsheikh-Ali	Conceived and designed the study; responsible for ethical, legal and social implications; coordinated and supervised the project; manuscript writing, editing, data coordination and management.	15	Alawi Alsheikh-Ali	
Mohammed Uddin	Conceived and designed the study; responsible for ethical, legal and social implications; coordinated and supervised the project; sample selection and population genetic analysis; DNA sequencing; variant annotation; assembly quality control and reliability analysis; variant detection, pangenome empirical analysis and quality control; pangenome applications; pangenome	15	Mohammed Uddin	

	visualization, complex loci analysis and graph creation; statistical analysis; manuscript writing, editing, data coordination and management.

Personal No-Objection Declaration

I, the undersigned authorized members, declare that I have no objection to receive team members monetary prize as per the above table.

Name	Total received percentage	Signature
1. Nasna Nassir	33.13	
2. Mohammed Uddin	33.76	
3. Alawi Alsheikh Ali	33.11
