

Date: 19 May 2026

To: The Distinguished Members of the Selection Committee for the *National Award for Distinguished Personalities - Outstanding & Impactful Contributions to the UAE Healthcare Sector*.

Subject: Formal Recognition of Appointment and Letter of Endorsement for **Dr. Abubaker Abdul Rahman Shaffi Al Madani** as Head of the Department of Neurology, Rashid Hospital.

Dear Members of the Selection Committee,

In my capacity as Chief Executive Officer of Rashid Hospital, Dubai, I am pleased to formally confirm the appointment of **Dr. Abubaker Abdul Rahman Shaffi Al Madani** as Consultant Neurologist and Head of the Department of Neurology at Rashid Hospital, and to extend my unreserved endorsement of his nomination for the National Award for Distinguished Personalities.

The Department of Neurology at Rashid Hospital is the largest neurology service in the United Arab Emirates, with specialised outpatient and inpatient services, and inter-hospital consultations across Rashid, Dubai and Latifa Hospitals. Dr. Abubaker assumed clinical and administrative leadership of this national-scale service and has discharged that responsibility with distinction since 2011.

Under his stewardship, the Department has delivered milestones of strategic importance to the UAE healthcare sector. These include the development of the Rashid Hospital stroke programme, the commissioning of the Neurology and Stroke Unit, the foundation of Dubai Health's multidisciplinary headache service, and the accreditation of Rashid Hospital as a Multiple Sclerosis Centre. Each of these is a direct, measurable contribution to the standard of neurological care available to every UAE resident.

As Head of Department, Dr. Abubaker has built and now sustains a multidisciplinary team operating registries in multiple sclerosis, dementia, neuropathy, headache, movement disorders, and epilepsy; specialised clinics in neuromuscular medicine, botulinum toxin therapy, baclofen pump management, and deep-brain-stimulation programming; and a teaching programme that underpins the Rashid Hospital Neurology Residency Programme. He further serves as Vice President of the Emirates Neurology Society (EMINS) and represents the United Arab Emirates within international specialty federations, including the European Headache Federation, the European Migraine and Headache Alliance, and the World Federation of Neurology.

On behalf of Rashid Hospital, I record my formal recognition of Dr. Abubaker as the clinical and administrative leader of the Department of Neurology at Rashid Hospital, and I attest that the achievements set out in his nomination dossier are accurate, verifiable through institutional records, and consistent with the values of national service that this award seeks to honour.

It is therefore with great confidence and on behalf of Rashid Hospital that I commend Dr. Abubaker Abdul Rahman Shaffi Al Madani to the highest consideration of the Selection Committee.

Respectfully,

Dr. Fahad Omar Ahmed Baslaib

Consultant Interventional Cardiologist

Chief Amiri Affairs Officer & Executive Director – Rashid Hospital

Dubai Health
